## Keep GM debate in perspective

Greens MLC Lynn MacLaren stated on her website that 100 tonnes of GM canola had been knocked down in a Cunderdin hail storm and 'this' washed into a neighbouring non-GM paddock.

The non-GM farmer claims to

have found three GM seeds germinated in his paddock. They must have been huge if they weighed 100 tonnes.

I respect the right of non-GM farmers to grow their crops but let's keep this in perspective.
